

Ahmad Subair

Frontend Developer

Lagos, Nigeria | 07049567031 | ahmadsubair2005@gmail.com | [ahmadsubair.netlify.app](#) | [github.com/Abu-Sumayyah-05](#)

PROFESSIONAL SUMMARY

Frontend Developer with 2+ years of experience building fast, responsive, and visually polished web applications for businesses and startups. Proven ability to deliver real-world products — from AI-powered platforms to logistics and e-commerce solutions. Winner of the Nexus Hackathon (Solar IQ). Adept at translating business requirements into clean, maintainable code using React, Vue.js, TypeScript, and Tailwind CSS.

TECHNICAL SKILLS

Frontend	React, Vue.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
Integration	REST APIs, WebSocket, Django (API consumption), Environment Configuration
Tools	Git & GitHub, VS Code, Figma, Postman, Chrome DevTools, Vite
Deployment	Netlify, Vercel, Render

EXPERIENCE

Frontend Developer (Contract)

A4 Tech | [geta4tech.com](#)

- Collaborated with a cross-functional team to develop and maintain the company's client-facing website
- Implemented responsive UI components, improving consistency across mobile and desktop
- Contributed to performance improvements and usability enhancements using modern web technologies

Frontend Developer — Solar IQ (Hackathon Project)

Nexus Hackathon — Winner | [Solar Energy Intelligence Platform](#)

- Led frontend development of an AI platform that transcribes and analyses lectures to evaluate teaching effectiveness
- Built a full React + TypeScript + Tailwind CSS v4 frontend integrated with a Django/Python backend
- Implemented real-time WebSocket communication with ping/pong heartbeat for live session tracking
- Resolved complex deployment challenges across Netlify and Render, handling CORS, cookies, and auth flows

PROJECTS

Solar IQ — Solar Energy Intelligence Platform

Stack: React, TypeScript, Tailwind CSS

- Nexus Hackathon winning project — built under time-pressured competition conditions
- Intelligent platform providing solar energy insights and recommendations
- Delivered a polished, fully responsive frontend from concept to deployment

TeachSense — AI Classroom Intelligence

Stack: React, TypeScript, Tailwind CSS, Django, WebSocket

- AI-powered platform targeting African educational institutions
- Real-time lecture transcription and teaching effectiveness analysis
- Full frontend-backend integration with session management and live data streaming

E-Commerce Platform | [Live Demo](#) | [GitHub](#)

Stack: React, REST API

- Built product listing and shopping cart with reusable React components
- Fully responsive UI optimised for mobile and desktop

Markdown Editor | [Live Demo](#) | [GitHub](#)

Stack: Vue.js

- Live markdown preview with real-time rendering

- Clean, responsive interface built in Vue.js

Blog API Application | [Live Demo](#) | [GitHub](#)

Stack: Vue.js, REST API

- Dynamic post pages with routing and state/loading management

EDUCATION

B.Eng. Electronics and Computer Engineering

[Lagos State University \(LASU\)](#), Lagos, Nigeria

CERTIFICATIONS

- AltSchool Africa — Frontend Engineering
- AlmatTech

ADDITIONAL

- Nexus Hackathon Winner — Solar IQ (Solar Energy Intelligence Platform)
- Strong problem-solving skills with a passion for clean UI and great user experience
- Fast learner; continuously building and shipping projects to sharpen real-world skills
